CONCEPT NOTE

There is a standard protocol for pre-treatment and post-treatment time for yoga and various inter-discipline related components and yoga exercises.

Only by following such standard/factor elements, the discipline can prove to be fully beneficial. Since these standards are a part of remedial techniques, therefore, if they are ignored, the healer can only perform the treatment in a restricted manner.

Today, along with the promotion of yoga and interdisciplinarity, we also have to keep in mind the fact that even in the trap of marketism, we have to maintain the original form and spirit which is being established in the world due to its values .

You are cordially invited to this dialogue.

OBJECTIVES

- To create awareness about the ethical code for yoga therapy.
- Better co- ordination among yoga & Interdisciplinary subjects.
- To highlights the main features of the ethical code.
- To explore the concept of "Yogic Diagnosis" through ethical code.

SCOPE

The International Dialogue on Ethical code for Interdisciplinary and Yogic Diagnosis will provide a forum to the academic community engaged in teaching to share their research, experience and learning related views in the present context.
